Note on methodology:

> 2013 figures are pro forma:

- (1) of the acquisition by Natixis of Groupe BPCE's 60% stake in BPCE Assurances. The BPCE Assurances acquisition was realized on March 13th, 2014 with a retroactive effect as of January 1st, 2014. 40% of BPCE Assurances capital is still owned by MACIF and MAIF. The figures used for the pro forma income statement are based on BPCE Assurances contribution to Groupe BPCE consolidated accounts reported in 2013.
- (2) of the reclassification of the 15% Natixis share in CACEIS from the Securities services business (Specialized Financial Services) to the Corporate Center since 1Q13.
- (3) of the sale of Cooperative Investment Certificates (means the pro forma of the effective sale on August 6, 2013 of all CCIs held by Natixis to the Banques Populaires and the Caisses d'Épargne).

> Business line performance using Basel 3 standards:

Starting in 2013, the performances of Natixis business lines are presented using Basel 3 standards. Basel 3 risk-weighted assets are based on CRR-CRD4 rules as published in June 26th, 2013 (including Danish compromise treatment for qualified entities).

Capital is allocated to Natixis business lines on the basis of 9% of their Basel 3 average risk weighted assets.

Annualized ROTE is computed as follows: net income (group share) – DSN net interest/average net assets after dividend – hybrid notes – intangible assets – average goodwill. And, since 3Q13, this ratio include goodwill and intangible assets by business lines to determinate the ROE ratio of businesses (figures are pro forma in this presentation).

- The remuneration rate on normative capital is still 3%.
- Own senior debt fair-value adjustment calculated using a discounted cash-flow model, contract by contract, including parameters such as swaps curve, and revaluation spread (based on the BPCE reoffer curve)
- Exceptional items: figures and comments on this presentation are based on Natixis and its businesses income statements excluding exceptional items detailed page 6. Natixis and its businesses income statements including exceptional items (reported data) are available in the appendix of this presentation.

> 2013 figures are pro forma:

- (1) of the acquisition by Natixis of Groupe BPCE's 60% stake in BPCE Assurances. The BPCE Assurances acquisition was realized on March 13th 2014 with a retroactive effect as of January 1st, 2014. 40% of BPCE Assurances capital is still owned by MACIF and MAIF. The figures used for the pro forma income statement are based on BPCE Assurances contribution to Groupe BPCE consolidated accounts reported in 2013.

> Business line performance using Basel 3 standards:

Starting in 2013, the performances of Natixis business lines are presented using Basel 3 standards. Basel 3 risk-weighted assets are based on CRR-CRD4 rules as published in June 26th 2013 (including Danish compromise treatment for qualified entities).

Capital is allocated to Natixis business lines on the basis of 9% of their Basel 3 average risk weighted assets.

Annualized ROTE is computed as follows: net income (group share) – DSN net interest/average net assets after dividend – hybrid notes – intangible assets – average goodwill. And, since 3Q13, this ratio include goodwill and intangible assets by business lines to determinate the ROE ratio of businesses (figures are pro forma in this presentation).

> The remuneration rate on normative capital is still 3%.

> Own senior debt fair-value adjustment calculated using a discounted cash-flow model, contract by contract, including parameters such as swaps curve, and revaluation spread (based on the BPCE reoffer curve)

> Exceptional items: figures and comments on this presentation are based on Natixis and its businesses income statements excluding exceptional items detailed page 6. Natixis and its businesses income statements including exceptional items (reported data) are available in the appendix of this presentation.

Assumptions for valuation

Non-hedged ABS CDOs

Methodology

- Loss rates for subprime assets stand at:

	< 2005	2005	2006	2007
03/31/14	8.1%	20.1%	37.5%	64.9%
06/30/14	9.0%	20.3%	36.0%	67.8%

- Cash flow based valuation of RMBS, CLOs underlying in ABS
- Allocation of a 97% loss to transactions integrated in collaterals when rated CCC+ or below, except for underlying assets initially rated AAA for which discount has been set at 70% (for first rank securitization only)
- Valuation of other non-subprime underlying assets based upon write-down grid including the type, rating and vintage of the transactions

Monoline

Fair value of protection before value adjustments

- Economic exposure of ABS CDOs including subprime determined using the same method
- Economic exposure of other types of assets was determined based on Mark-to-Market or Mark-to-Model

Value adjustment

- Monolines are identified based on their creditworthiness. They are allocated a probability of default (PD) as follows:

PD	Monoline
15%	Assured guaranty, FSA Radian* CIFG
95%	
100%	

- In all cases, Recovery in case of default (R) is set at 10% except for CIFG which has a 0% recovery rate
- The specific provision is defined as the amount of Mark-to-Market (or Mark-to-Model) multiplied by the expected loss (Expected loss = PD x (1-R)) for each monoline
